SCHEDULING STATUS S0	SKEDULERINGSSTATUS S0								
PROPRIETARY NAME AND DOSAGE FORM CARDIOMAX VEGICAPS (softgel vegicapsules)	HANDELSNAAM EN DOSEERVORM CARDIOMAX VEGICAPS (sagte vegikapsules)								
COMPOSITION Each capsule contains: Co-enzyme Q10 150 mg (Ubidecarenone) Excipients: Beeswax, carrageenan, dibasic sodium phosphate, glycerol, hydroxypropyl starch, lecithin, soya oil, vegetable oil, iron oxide black and red, purified water. Contains no sugar.	SAMESTELLING Elke kapsule bevat: Koënsiem Q10 150 mg (Ubidecarenone) Onaktiewe bestanddele: byewas, carrageenan, dibasiese natriumfosfaat, glierol, hydroxypropiel styssel, lesitiën, soja-olie, groente-olie, ysteroksied swart en rooi, gesuiwerde water. Bevat geen suiker.								
CATEGORY D34.13 Other.	KATEGORIE D34.13 Ander.								
PHARMACOLOGICAL ACTION Coenzyme Q10 is a naturally occurring coenzyme involved in electron transport in the mitochondria. This vitamin-like compound is present in virtually all cells. Its primary functions include activity as an antioxidant, a membrane stabilizer, and as a co-factor in many metabolic pathways. Pharmacodynamic properties Co-enzyme Q10 is important in the production of adenosine triphosphate (ATP) in oxidative respiration. Coenzyme Q10 increases plasma levels of high density lipoprotein (HDL) cholesterol, vitamin E, and vitamin C, and decreases levels of total cholesterol, low density lipoprotein (LDL) cholesterol, and products of lipid peroxidation. Coenzyme Q10 does not affect the cholesterol-lowering effect of statins. Pharmacokinetic properties Coenzyme Q10 is absorbed from the small intestine, passes into the lymph, and finally to the blood and tissues.	FARMAKOLOGIESE WERKING Koënsiem Q10 is 'n natuurlike koënsiem wat betrokke is met die vervoer van elektrone in die mitochondria. Hierdie vitamien-agtige molekule is teenwoordig in feitlik alle selle. Die primêre funksie van koënsiem Q10 is die van 'n antioksidant, 'n membraan stabiliseerder, en as 'n ko-faktor in baie metaboliese prosesse. Farmakodinamiese Eienskappe Koënsiem Q10 is belangrik in die produksie van adenosientrifosfaat (ATP) gedurende oksidatiewe respirasie. Koënsiem Q10 verhoog plasma vlakke van hoë-digtheid lipoproteïen (HDL) cholesterol, vitamien E en vitamien C, en verlaag die vlakke van totale cholesterol, lae digtheid lipoproteïen (LDL) cholesterol, en produkte van lipied peroksidasie. Koënsiem Q10 het geen invloed op die cholesterol verlagende effek van statiene nie. Farmakokinetika eienskappe Koënsiem Q10 word uit die dunderm geabsorbeer, en vervoer na die limf, en dan uiteindelik na die bloed en weefsel.								
INDICATIONS Helps maintain cardiovascular health and helps protect cells from oxidative stress. Supplementation of Co-enzyme Q10	INDIKASIES Help om kardiovaskulêre gesondheid te handhaaf en help om selle teen oksidatiewe stres te beskerm. Aanvulling van Koënsiem Q10								
CONTRAINDICATIONS Patients with known hypersensitivity to any of the ingredients. Patients taking warfarin or other anti-coagulant medication.	KONTRA-INDIKASIES Pasiënte met 'n bekende hipersensitiwiteit vir enige van die bestanddele. Pasiënte wat Warfarin of ander anti-koagulerende medikasie moet neem.								
WARNINGS AND SPECIAL PRECAUTIONS Coenzyme Q10 may lower blood pressure and can cause additive effects when used in conjunction with medication for hypertension. Coenzyme Q10 might affect blood pressure during and after surgical procedures. Discontinue the use of coenzyme Q10 at least 2 weeks before elective surgical procedures. Special precautions It is advisable to consult a relevant health-care provider prior to use if taking either blood pressure medication or blood thinners. Cigarette smoking depletes body stores of coenzyme Q10. Effects on ability to drive vehicles and use machinery: Not known, see side effects. Not suitable for children unless under the care of a relevant health-care provider.	WAARSKUWING EN SPESIALE VOORSORGMATREELS Koënsiem Q10 kan bloeddruk verlaag en kan toevoeglike effekte hê as dit gebruik / gedrink word saam met medikasie vir hipertensie. Koënsiem Q10 kan bloeddruk aftekeer tydens en na chirurgiese prosedures. Staak die gebruik daarvan ten minste 2 weke voor die sjiurrgie. Spesiale voorsorgmaatreels Raadpleeg 'n gesondheidsorg professioneel voor gebruik as jy bloeddruk medikasie of bloedverduuners vat. Sigaretrook kan die liggaam se koënsiem Q10 store uitput. Effek op die vermoë om motor te bestuur en masjinerie te gebruik: Nie bekend, sien nuwe-effekte. Nie geskik vir kinders tensy onder die sorg van 'n gesondheidsorg professioneel.								
INTERACTIONS Coenzyme Q10 can decrease blood pressure and might have additive blood pressure lowering effects when used with antihypertensive drugs. It might reduce the anticoagulation effects of warfarin.	INTERAKSIES Koënsiem Q10 kan bloeddruk verlaag en dalk 'n toevoeglike bloeddruk verlaagings effek hê as dit saam met antihypertensiewe middels gebruik word. Dit kan die antistolerapeutiese effekte van warfarin verminder.								
PREGNANCY AND LACTATION Safety during pregnancy and lactation has not yet been established. Consult your medical practitioner before use.	SWANGERSKAP EN LAKTASIE Veiligheid tydens swangerskap en laktasie is nie vasgestel nie. Raadpleeg jou mediese praktisyn.								
DOSAGE AND DIRECTIONS FOR USE Adults - Take one capsule daily. To promote maximum absorption, capsule should be taken with the main meal of the day.	DOSIS EN GEBRUIKSAANWYSINGS Volwassenes - Neem een kapsule daaglik. Om maksimum absorpsie te bevorder, neem die kapsule met die hoof maaltyd van die dag.
